

Overview

There are two files. “dataforPub.mat” contains the data and “analysisForPub.m” contains the code to reproduce the results.

Replication

“analysisForPub.m” will reproduce all the tables and the statistical tests in the body of the text. One only needs to change the working directory to the directory of the “dataforPub.mat” file.

Software version and extra packages

The results are produced using MATLAB R2023b update 6 and the following extra packages: Statistics and Machine Learning Toolbox

- Statistics and Machine Learning Toolbox

Data dictionary

- Foul: Service quality index - negative offerings.
- Benefit: Service quality index - positive offerings.
- BenefitWithoutGPS: Service quality index - positive offerings, excluding the use of GPS.
- Assistant: Research Assistant.
